"2008-2010. Bicentenario de la Independencia y Centenario de la Revolución en la Ciudad de México"

Mexico City is very proud to host the 53rd International Americanists Congress which has, consistently, over the past 134 years, made important contributions to the knowledge of our deepest roots as one people in America.

The forward motion of ideas, thoughts, disciplines and current conditions make this meeting appropriate for the strengthening of the existing links between our nations, as a preamble to the bicentennial celebrations of freedom in America already taking place in our continent.

The International Americanists Congress will continue to strengthen the fraternal bonds between America and the rest of the world, to widen the knowledge of our multicultural reality, which has profoundly contributed to

universal well-being for over five hundred years. The multidisciplinary studies carried out by the Congress have allowed us to learn about our history, identity and needs, but also about social, economic and technological solutions which make us part of a shared world without time nor space.

The first time Mexico was honored as the host of the Congress was back in 1895 and since then we have had the honor of hosting it six times; on this seventh joyous occasion we welcome all of you, and as we say here in Mexico: *Están ustedes en su casa.*
